📍 Jakarta, Indonesia (Ready to Relocate)

PROFESSIONAL SUMMARY

Data Analyst with a computer science background and proven experience managing large-scale operational data and building automation systems using SQL & Python (p. 1). Highly skilled in data validation, query optimization, and developing interactive dashboards to deliver valuable business insights (p. 1). Adaptive to technological advancements, backed by various certifications in Data Analytics and AI

PROFESSIONAL EXPERIENCE

Junior Technical Support – PLN Icon Plus

Jakarta Selatan, Indonesia | Nov 2023 – Dec 2024

- **Data Validation & Query Optimization:** Improved data accuracy to >99% by implementing SQL-based validation processes, enabling faster and more reliable decision-making.
- **Process Automation:** Automated manual workflows using Excel Macros and optimized SQL queries, reducing processing time by 20% and increasing team efficiency.
- **Access Management & Migration:** Managed data migration for 100+ users to FRAOnline using Role Based Access Control (RBAC), improving system security and access management.
- **Data Troubleshooting & SLA Management:** Resolved 400+ data-related issues with a >95% success rate in compliance with SLAs to ensure system stability and reliable reporting.

TECHNICAL SKILLS & EXPERTISE

- **Tools & Cloud :** PostgreSQL, MySQL, GCP (BigQuery), Microsoft Fabric, Looker Studio, MLflow
- **Programming & Data :** Python (Pandas, NumPy), ETL Pipelines, Data Validation & Cleansing
- **Monitoring & AI :** Predictive Modeling, Model Monitoring, Prometheus, Grafana, MS Office

EDUCATION

Universitas Teknologi Yogyakarta – Bachelor of Informatics

Sleman, Yogyakarta | 2019 – 2023 | GPA: 3.14 / 4.00

PROJECT

- **Personal Data Analytics Portfolio** : Analyzed 1000+ popular YouTube videos using SQL & Looker Studio to identify engagement trends and generate actionable content insights.
 - **Natural Image Classification using CNN** : Developed a CNN-based image classification model using TensorFlow/Keras to classify 8 categories of natural images with >85% validation accuracy and deployment-ready export formats (TFLite & TensorFlow.js).
 - **Thesis Project** : Implemented Smart Facial Attendance System using Local Binary Patterns Histogram (LBPH) for automated facial recognition and attendance tracking with high accuracy
-

CERTIFICATIONS

- **HackerRank** : SQL (Advanced)
 - **Google Cloud x Dicoding** : Data Analytics & Cloud (BigQuery, Data Warehouse, Gemini)
 - **Microsoft Elevate x Dicoding** : Data Science with Microsoft Fabric, Generative AI with Azure, Fundamental Generative AI, Data Processing Fundamentals & Building Machine Learning Systems
 - **IBM SkillsBuild x Dicoding** : Introduction to Artificial Intelligence, Generative AI, AI Ethics & Fundamentals of Deep Learning
 - **DBS Foundation x Dicoding** : AI, Python & Machine Learning (Basic)
 - **Microsoft Office Specialist (MOS)** : Word 2019
-

LANGUAGES

- **Bahasa Indonesia**: Fluent
- **English**: Intermediate (Speaking, Writing, Reading)
